Summary

AI-focused Full Stack Developer experienced in building scalable web applications, AI orchestration systems, and real-time workflow platforms using Next.js, TypeScript, React.js, Node.js, and MongoDB. Skilled in API integration, machine learning workflows, authentication systems, and modern distributed architectures with strong problem-solving and system design fundamentals.

Technical Skills

Languages: C++, Python, Java, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases & Cloud: MongoDB, PostgreSQL, AWS, Vercel

AI & Tools: AI APIs, TensorFlow, Machine Learning, SSE, JSON Validation, Git, GitHub, VS Code

Core Concepts: Full Stack Development, API Integration, Scalable Systems, OOP, DBMS

Projects

OneAtlas AI Pipeline — Next.js, TypeScript, SSE, AI APIs, Vercel

- Built a multi-provider **AI orchestration pipeline** capable of routing requests across multiple AI models and services.
- Implemented real-time workflow stage streaming using Server-Sent Events (SSE) for live execution tracking and monitoring.
- Designed scalable AI workflow architecture with optimized request handling and provider integration.
- Integrated multiple AI APIs with structured response handling and real-time pipeline updates.
- Deployed the application on Vercel with optimized frontend performance and modern architecture.

AI App Compiler System — Next.js, TypeScript, AI APIs, JSON Validation

- Developed an AI-powered compiler system converting natural language requirements into executable configurations.
- Implemented intelligent parsing, automated validation, and self-repair logic for structured generation.
- Built scalable prompt-processing workflows using LLM APIs for dynamic application blueprint generation.
- Optimized JSON validation pipelines for reliable software configuration outputs.
- Designed modular architecture supporting extensible application generation workflows.

Team Task Manager — React.js, Node.js, Express.js, MongoDB, JWT

- Built a full-stack team collaboration and task management platform with role-based access control.
- Implemented JWT authentication with bcrypt password hashing and protected frontend routes.
- Developed Admin and Member dashboards for managing projects, workflows, and assignments.
- Created RESTful APIs for project management, collaboration, and activity tracking.
- Designed responsive dashboards with real-time task tracking and collaborative workflow management.

Certifications

- Databases and SQL for Data Science - IBM
- Introduction to Databases - META
- React Native - META
- Cybersecurity Attack and Defense Fundamentals - EC Council
