EDUCATION

Chandigarh University <i>Bachelor of Engineering in Computer Science</i>	Mohali, India Aug. 2022 – Present
Government Public School <i>10+2 in Non-Medical, Percentage: 61.2%</i>	Palampur, H.P April 2021
Priyadarshni Sr Sen Sec School <i>10th, Percentage: 83%</i>	Palampur, H.P May 2019

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, SQL
Frameworks & Tools: React, Node.js, MongoDB, Express.js, TensorFlow, Arduino
Developer Tools: Git, AWS, VS Code, Canva
Soft Skills: Team Collaboration, Leadership, Problem-Solving

PROJECTS

Sweet Shop Management System <i>TypeScript, Node.js, React, PostgreSQL, JWT, Jest</i>	Present
- Built a full-stack e-commerce system using Test-Driven Development (TDD) with comprehensive automated testing using Jest - Implemented JWT-based authentication and role-based access control for Admin and User roles with protected API endpoints - Developed RESTful APIs with Express.js and TypeScript for inventory management, user authentication, and purchase operations - Created React frontend with search functionality by name, category, and price range, and dynamic inventory displays - Designed PostgreSQL database schema for users, sweets inventory, and transactions with proper relationships - Implemented admin dashboard for CRUD operations on inventory, restocking, and real-time stock management	
AeroLink <i>MongoDB, Express.js, React, Node.js</i>	June 2024 – July 2024
- Developed a full-stack flight booking web application using the MERN stack - Streamlined the air travel reservation process with a secure, scalable, and user-friendly interface - Designed features for both travelers and airline administrators, enabling efficient booking, management, and monitoring - Focused on personalization and performance, delivering a smooth and responsive user experience - Engineered the platform with scalability and future expansion in mind, supporting high traffic and growing user needs	
Online Code Editor <i>React, Monaco Editor, Node.js, WebSockets</i>	Feb. 2024 – May 2024
- Developed an online code editor using React and the Monaco Editor, providing a user-friendly interface for coding - Implemented real-time collaboration features, allowing multiple users to edit code simultaneously - Integrated a backend using Node.js to handle user authentication, project saving, and execution of code snippets - Utilized WebSockets to enable live updates and seamless synchronization across different users' sessions - Supported multiple programming languages with syntax highlighting and customizable editor themes
